- Conditions for longer brush life
- Leaves no oily residue
- Leaves a pleasant vanilla scent
- Environmentally safe
- Non-carcinogenic
- Available in 4 oz, 8 oz, 32 oz sizes

The most requested makeup brush cleaner on the market, Cinema Secrets Professional Brush Cleaner is known for its rich blue color, vanilla fragrance, and superior performance.

Top professionals rely on the quick-drying formula to clean, sanitize, and leave tools with a pleasant smell. Safe for use with natural and synthetic hairs, the cleaner immediately dissolves all traces of wax, liquid, and powder residue from brushes, spatulas, and palettes. It's the only makeup brush cleaner to instantly remove 99.9% of all bacteria, and it conditions bristles to extend brush life.

To clean brush, stroke dirty brush on a tissue or paper towel first to wipe off excess makeup. Then pour a small amount of brush cleaner in a bowl or other container, and dip brush or tool in cleaner. Remove immediately then wipe clean on tissue. Repeat a second time if necessary. Allow to air-dry for two to ten minutes, depending on the brush size. For faster drying (30 seconds), lay brushes flat on a non-porous surface, hold brushes in place by handles, and fan hair dryer from six inches away for a maximum of 30 seconds. For larger blush and powder brushes, dip only 15% of the brush tip, then position brush with the bristle-side up to allow liquid to flow to the bristle roots at the ferrule. Wipe clean and allow to dry.
