

GLAMOUR PRESSED POWDERS

Multi-Function Blush Compact Includes Mirror & Blush Brush

These shades of powder blush create a naturally radiant glow when swept across cheekbones and dusted lightly on nose and forehead. Sweep a small amount of blush over eye lids as well to make eyes appear more vibrant and alert.

HD Pro Powder™ Foundation, .41 oz.

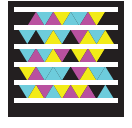

In the industry these are known as dual active and high definition powders. Applied wet or dry, usually dry, HD Pro Powder™ is ideal for Hi-Def video, TV, film, and print work to soften features and remove glare. Also ideal for daily use by the girl on the go. For a flawless finish, apply directly over our Hi-Def Glamour Cremes (see page 22 & 23) in lieu of face powders. For replacement sponges, see p.59.

TIPS AND TECHNIQUES

"HD Pro Powder™ can be applied dry with either a brush or the provided sponge. Using a brush will allow more translucency, while a sponge will provide more opaqueness to the coverage. Apply with a wet sponge for even greater coverage. When using over a creme foundation application, it is suggested that a light brush (like a fan brush) be used to apply the HD Pro Powder™ for a soft and natural looking finish to the makeup." -Suzanne Patterson
