## Hi-Def Glamour Cremes, 1/2 oz.

Our Hi-Def Glamour Shades are classified into Warm, Cool and Neutral for the convenience of the makeup artist or daily wear makeup user.

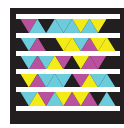

© Jason Christopher

Our Hi-Def Glamour Cremes, as coined by Marianne Skiba, one of the Key Makeup Artists on TV's super popular "Law & Order," are ideal for Hi-Definition makeup whether or not you're in front of a camera. This formula is soft and silky, light enough for everyday use, but with enough coverage to perform through even the most demanding of circumstances while yielding a flawless finish.

We asked Hollywood makeup artist Brad Look, who worked on STAR TREK ENTERPRISE, to help us create a line of colors comprised of the most commonly used shades in the professional makeup business today. Relying heavily on Brad's extensive knowledge of digital and HDTV color requirements, we created this timeless and tremendously useful color range. Next, we duplicated each shade into our GlamAire™ airbrush makeup (p.52), so that artists can use cross platform application on the same face without having to match colors from scratch. We hope you find these products as useful for you as Brad and his Hollywood makeup artist peers have found them.
